COMPANY PROFILE

PT. ANGKASA PRIMA TEKNOLOGI

www.ap-teknologi.co.id

ABOUT US

Discover ANGKASA PRIMA TEKNOLOGI – Indonesia's premier satellite service provider. With official licenses from JARTUP and SISKOMDAT, endorsed by the Government of Indonesia, we're at the forefront of satellite telecommunications.

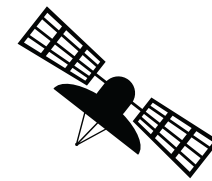

Experience our diverse range of solutions, from VSAT services to 4G BTS Backhaul, VSAT broadband, VMS/AIS tracking, satellite communication, IOT, Remote Surveillance, Satellite Imagery, and AI ML solutions.

Our expert team brings decades of experience, collaborating with global and regional satellite operators and ground station principals.

Choose ANGKASA PRIMA TEKNOLOGI for innovation without limits and connectivity without boundaries

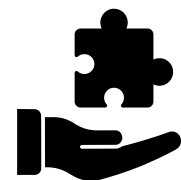

OUR MISSION

Most advance in integrated satellite service provider

Delivery satisfactory service level within industrial standard

Provide comprehensive product & services

Business model that suits costumer needs

Satcom Maritime

Our Maritime Solution with Starlink, L-Band & Ku-Band service lowering customer's Operational Expenses, increase productivity and we are Highly Available

VSAT for Land Internet Service

Our VSAT Internet Service brings Internet Access to customer location in areas that are impossible or uncovered by Cellular Internet nor Internet Fiber access.

Satellite Imagery & Geospatial System

Our Remote Sensing services can provide satellite imageries with various solution start from infrared, radar, virs, elint & optical . Applicable for natural resources monitor, disaster prevention, agriculture, forest, environment protection

4G Cellular Backhaul

Our 4G BTS (Base station) Satellite backhaul makes it feasible to offer cellular services in areas that are impossible or prohibitively expensive to reach using traditional terrestrial means, such as fiber, cable or microwave

Internet of Things

We provide IoT on demand especially for Part Ships Monitoring such as CCTV, Vessel Tracking, Fuel Monitoring, Tactical Comm and etc.

OUR CUSTOMERS

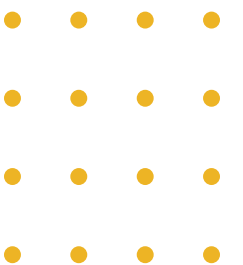

NETWORK ELEMENT & ECO SYSTEM SUPPORTED BY

COMMUNICATION SATELLITE SYSTEM SUPPORTED BY

REMOTE SENSING SATELLITE SYSTEM SUPPORTED BY

SATCOM FOR MARITIME

Our Maritime product "AKASAT" VSAT service lowering customer's Operational Expenses, increase productivity and we are Highly Available to provide Starlink, VSAT & L-Band solution such as :

- Starlink
- Ku Band & C band
- L-Band : Thuraya, Inmarsat , Iridium

VSAT FOR LAND INTERNET SERVICE

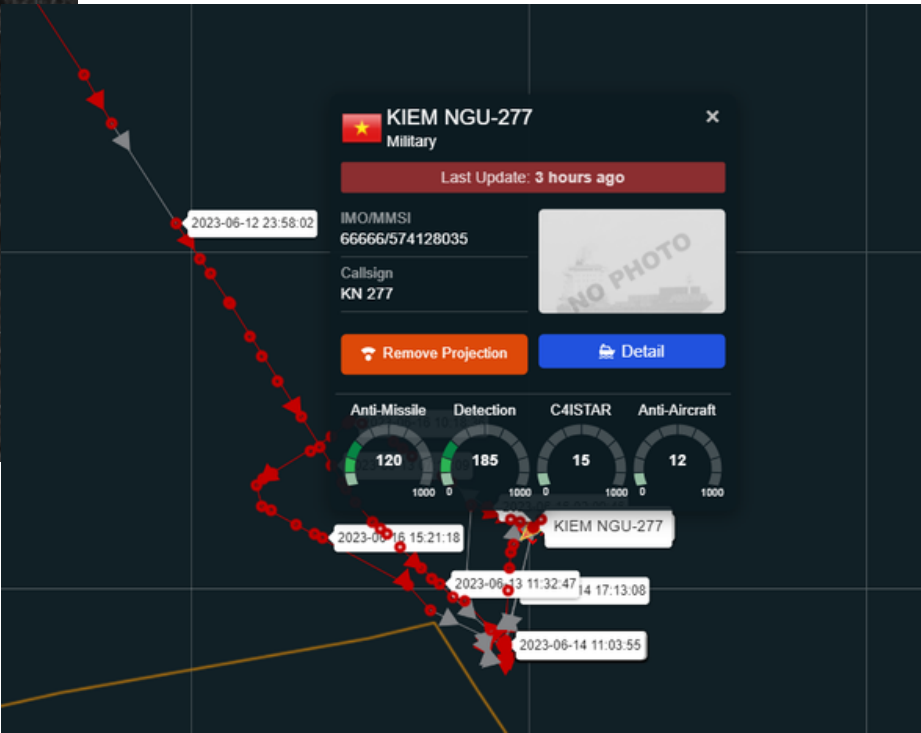

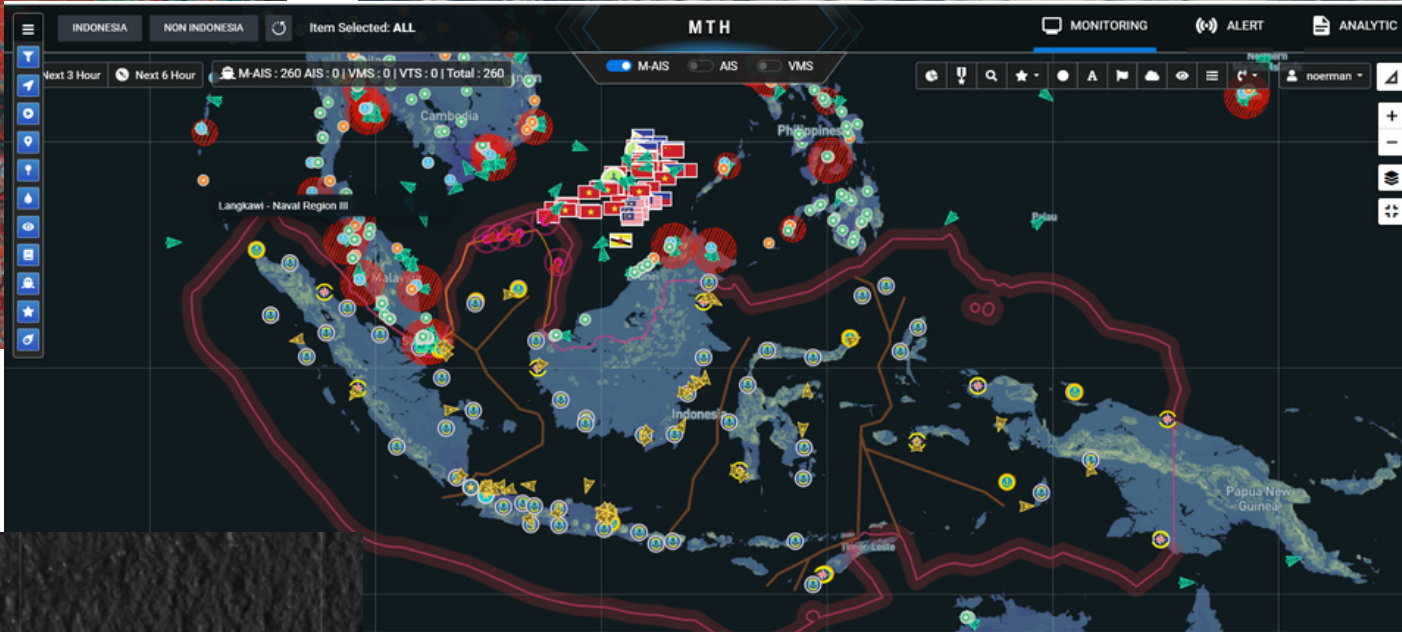

Our VSAT Internet Service brings Internet Access to customer location in areas that are impossible or uncovered by Cellular Internet nor Internet Fiber access.

SATELLITE IMAGERY & ANALYTICAL GEOSPATIAL SYSTEM

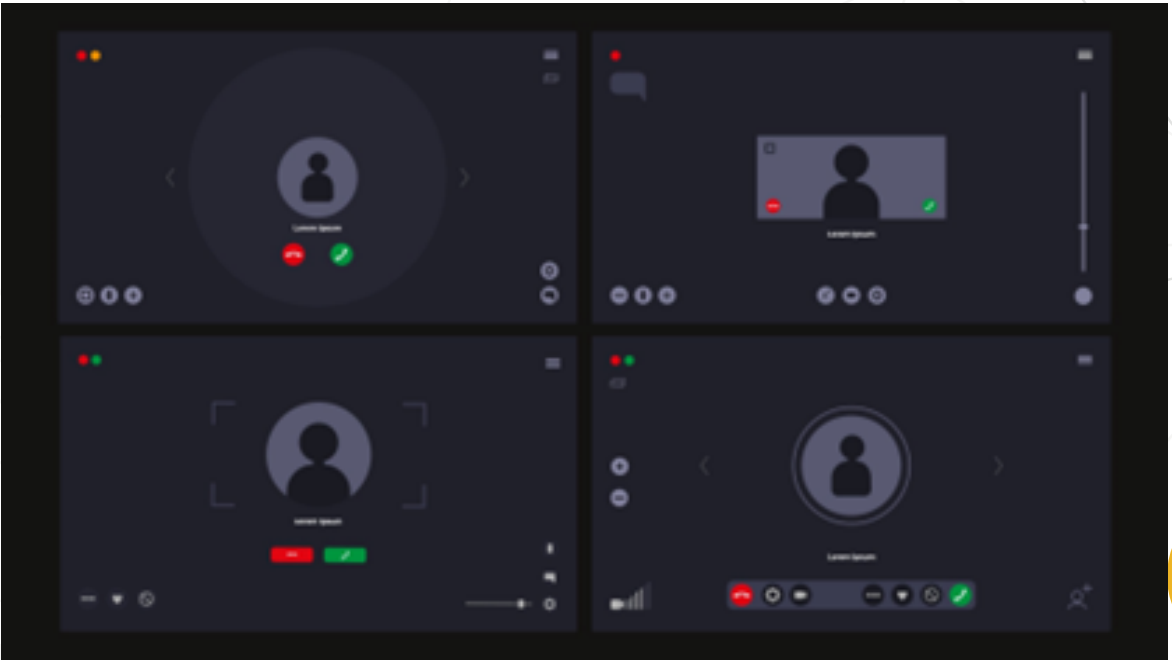

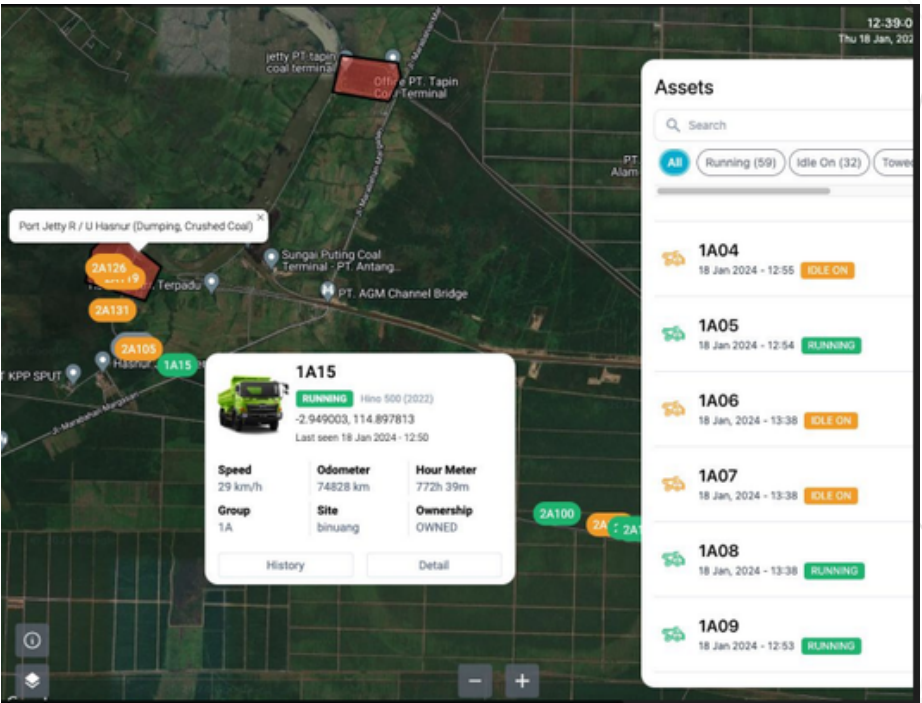

Our Product and service is a complete & we are Highly Available for reporting, analytics & big data based on Artificial Intelligence (AI) and Machine Learning (ML)

INTERNET OF THINGS

We provide IoT on demand especially for Part Ships Monitoring such as CCTV, Comm Platform, Vessel Tracking, Fuel Monitoring and Tactical Comm System etc.

4G CELLULAR BACKHAUL

Our 4G BTS (Base station) Satellite backhaul makes it feasible to offer cellular services in areas that are impossible or prohibitively expensive to reach using traditional terrestrial means, such as fiber, cable or microwave.

2026

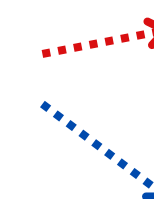

Leased Capacity Expansion for BAKTI Komdigi (up to 1 Gbps) & Expand HUB System with multiple satellite partner

2025

Expand Business to Mining with end to end solution

2024

Expand HUB System : partnership with multiple satellite partners

Comm Sat Partner : AsiaSat, Measat, Chinasat, Inmarsat, Iridium, OneWeb

Imagery Sat Partner : Eartheye, MAXAR, Blacksky, Planet Labs, Unseen Labs etc

2022

Expand Market : gov agencies, telco providers, maritime agencies, B2B in maritime, B2B oil & gas, B2B in mining, B2B in forestry, B2B in logistic, start M&A

2022

Expand Business to Maritime Segment : perform PoC of Monitoring Digitalization of Quota Based Fisheries with VMS (Vessel Monitoring) solution

2021

Awarded Satellite Leased Capacity XL Axiata Non 3T & BAKTI KOMINFO 4G

2020

Awarded VSAT Internet from Provinsi Maluku

2019

Our first SkyEdgeGilat Hub ground station to live support Telkomsel's site at Halmahera & Maluku Island (backhaul services)

Passed Prof of Concept in Telkomsel's Network as cellular backhauling 3G & 4G

Strategic Partnership & Collaboration : TRG, Gilat & Teleglobal

Angkasa Prima Teknologi (APT) reflects an unstoppable drive for connection powered by technology, precision, and the courage to reach even the most challenging areas. As a provider of satellite communication and network infrastructure solutions, APT is committed to delivering reliable, adaptable services built for real operational needs. Its visual identity is expressed through a logo where **red symbolizes** energy, decisiveness, and innovation, showing APT's proactive spirit in expanding national connectivity. **The curved orbital** form represents satellite movement, global reach, and continuous connection, highlighting APT's ability to link locations from business hubs to remote regions. Clean, modern lettering reinforces APT's engineering-driven, professional, and solution-focused approach. Together, **these elements shape APT** as a trusted technology partner that enables customers to focus on their core business while APT ensures seamless connectivity.
